Knowledge Creates a Head Start

The Ecoclean Academy combines specific knowledge in industrial cleaning technology with long-term experience. Due to the complexity and the specific issues in industrial component cleaning, we offer various well-developed training modules for your needs. You and your employees qualify yourself with seminars on cleaning technology and system processes as

well as with training modules specially developed for operators and maintenance staff. You can identify possible deviations in your cleaning system or in your process at an early stage and reliably initiate the necessary countermeasures. In this way, you create a head start through knowledge for your company.

You would like to find out more, have questions or need an individual offer and personal advice? Our trainers look forward to your message.

Our Seminars & Trainings at a Glance

FUNDAMENTALS OF INDUSTRIAL PARTS CLEANING

You will learn to evaluate the effectiveness and efficiency of the cleaning process, thus gaining the ability to guarantee a high-level and stable quality of the final product. Moreover, you will get sensitized to feasibility aspects and available options in cleaning technology and will learn how to evaluate cleanliness requirements correctly.

Course dates: year-round, upon request

Venue: Academy Filderstadt or locally at your site

ANALYSIS AND OPTIMIZATION

Investigate and improve processes

In cooperation with your local personnel we shall examine the cleaning quality, throughput capacity, cycle times and process stability of your manufacturing chain. Analyzing upstream/downstream workflows, we shall adapt the influencing factors acting on your cleaning process so as to optimize the tasks at hand.

Course dates: year-round, upon request

Venue: Locally at your site

TECHNICAL CLEANLINESS

Inspection in accordance with VDA 19.1

In our intensive workshop for a maximum of four participants, you will learn not only basic theoretical knowledge, but also to carry out a high-precision cleanliness analysis, document the results and create a professional test report.

Course dates: year-round, upon request

Venue: Academy Filderstadt

TECHNICAL MACHINE TRAINING

For operators, users, service and maintenance staff

We offer technical courses designed specifically to meet your needs. Immediately applicable specialist knowledge on topics such as how the Ecoclean / UCM cleaning systems work, system operation, safety aspects, performing simple maintenance and cleaning work, etc.

Course dates: year-round, upon request

Venue: Locally at your site

ONLINE TRAININGS AND WEBINARS

We address your specific training needs with an individual online seminar. Regardless of whether it concerns general questions about industrial parts cleaning, your machines or challenges in terms of component cleanliness. Online, at your desired date and with exactly the seminar content that you need for your success.

Course dates: year-round, upon request

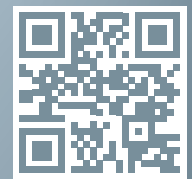

Venue: Online via Microsoft Teams
